

CLIMATE IMPACT AND CONSEQUENCES OF CLIMATE CHANGE ON THE ENVIRONMENT, DEVELOPMENT OF ADVANCED SYSTEMS AND TECHNOLOGIES FOR LAND MANAGEMENT, AND RELATIONSHIP BETWEEN CHANGE IN THE GLOBAL ENVIRONMENT AND AGRO-ECOSYSTEMS

Agenda 2030 Goal - Climate action

It is a service agreement between the UN-World Food Programme and ENEA, aimed at creating capacity building and ensuring transfer of know-how to two priority countries (Ethiopia and China), under the intervention programmes of the Regional Bureaux and the Emergency Preparedness and Response Branch (ODEP 2009 - 2010)

Recipient country:

Ethiopia

Period:

2010

ENEA Activities:

Transfer of know-how and capacity building

. Ethiopia: training to local counterparts on LEAP (Livelihoods, Early Assessment and Protection) software, co-developed by ENEA; technical support to the National Meteorologic Agency during the test phase of the meteorological stations and their integration in the national network

Purpose:

General environmental protection

Sector:

Environmental research

Status:

Completed

ENEA Technology Datasheet:

Monitoring and assessment of climate change impact
