

Working together for the magnets that will deliver the energy of the future

Fusion for Energy, the organisation managing the European Union's contribution to ITER, together with ASG Superconductors, Iberdrola Ingeniería y Construcción, Elytt Energy, CNIM, SIMIC and the ICAS consortium, invite you to visit the facility where some of the biggest and most sophisticated superconductive magnets to date are being manufactured for the ITER project.

Guests will have a unique opportunity to view Europe's first ITER magnet before it is inserted in its case and enjoy a guided tour on the premises of ASG Superconductors, where in collaboration with other companies, the impressive components are being produced.

Friday 19 May 2017 ASG Superconductors

via Melara 40, La Spezia, ITALY

10:15	Registration at the entrance of ASG Superconductors (see annex with map)
10:30 - 11:15	Welcome addresses by host, political authorities and representatives of Fusion for Energy and ITER Organization
11:15 - 12:15	Technical briefing with Fusion for Energy and companies Questions and Answers
12:15 - 12:30	Photocall
12:30 - 13:15	Guided Tour
13:15 - 14:30	Cocktail

The core of Europe's first Toroidal Field (TF) coil which will be used to confine the ITER plasma.
