THE ITALIAN COOPERATION AT EXPO 2015

The event Water-Energy-Food Nexus of 21st May is part of a larger initiative launched by the Directorate General for Development Cooperation (DGCS) of the Italian Ministry of Foreign Affairs and International Cooperation.

The cooperation's presence at EXPO 2015 will be shaped through a series of events and initiatives, organized by the DGCS in partnership with other organizations. The main focus will be to convey some key messages related to the following aspects:

- *the new post-2015 development agenda; practical meaning for governments and citizens; individual and collective policies and behaviour;*
- *scientific and technological challenges in food security and sustainable agriculture within the context of growing pressure on natural resources; strategies to face these challenges;*
- *roles and responsibilities of players within the Italian system of cooperation in the new development agenda; translating the global partnership for development into actions.*

Brief note on Scientific Coordinators Institutions

WAME World Access to Modern Energy

WAME & EXPO 2015 is an association founded by eight leading European energy companies and the organizers of Expo 2015.

The theme of the world Expo 2015 is Feeding the Planet - Energy for Life. Increased access to modern energy would increase access to water and food immensely and help achieve the general goal of reducing extreme poverty and enhancing human development.

WAME's mission is to take full advantage of the unique opportunity offered by Expo 2015 to inform, promote a deeper knowledge, and spread good practices regarding World Access to Modern Energy.

ENEA Italian National Agency for New Technologies, Energy and Sustainable Economic Development

ENEA is the Italian National Agency for New Technologies, Energy and Sustainable Economic Development (<http://www.enea.it/en>). It is a public RTO (Research and Technology Organization), with around 2.700 staff employees distributed in Rome Headquarters, ENEA-EU Liaison Office, 9 research centres, 5 laboratories, 11 local offices all over the national territory. The Agency's activities are mainly focused on Energy Efficiency, Renewable Energy Sources, Nuclear Energy, Climate and the Environment, Safety and Health, New Technologies, Electric System Research.

ENEA's multidisciplinary competences and great expertise in managing complex research projects are put at the disposal of the Country system. Specifically, its activities are devoted to: basic, mission-oriented, and industrial research exploiting wide-ranging expertise as well as experimental facilities, specialized laboratories, advanced equipment. ENEA also develops new technologies and advanced applications; provides public and private bodies with high-tech services, studies, measurements, tests and assessments; delivers training and information activities aimed at providing greater public knowledge and awareness on the Agency's fields of competence, and a higher level of dissemination and transfer of research results, thus promoting their exploitation for production purposes.

It conducts research and innovation activities, and provides public administration, enterprises and citizens with its advanced services.
