

ENERGY EFFICIENCY MARKET AND CLIMATE CHANGE MITIGATION

OCTOBER 29TH, 2015

ENEA – VIA G. ROMANO 41, 00196 ROMA

The world prepares for the COP21 climate negotiations in Paris this year: ENEA organizes a half-day workshop focused on energy efficiency and its key role for the climate change mitigation.

The presentation of the Energy Efficiency Market Report 2015, recently launched by the International Energy Agency, is the opportunity for the comparison between international best practices and Italian policies. Thanks to the presence of experts from the Ministry of Economic Development, the state of art of the measures adopted for the transposition of the 2012/27/UE Directive, and the Italian energy efficiency market will be provided, with a look into the future and the 2050 pathway for the decarbonization of the country.
