

Cooperation between ENEA *Italian National Agency for New Technologies, Energy and Sustainable Economic Development* and IMELS *Italian Ministry of Environment, Land and Sea* on Technology Transfer and Cooperation Programmes in the Developing Countries

Rome, May 16th 2019
EXCO 2019 – Fiera di Roma, Pav. 7

ENEA and IMELS collaborate in support activities and technology transfer towards the Developing Countries (PVS), through the definition, design and implementation of mitigation and adaptation actions aimed at reducing the impacts of Climate change.

These activities are part of the national commitments provided under the United Nations (UNFCCC) Framework Convention on Climate Change and the bilateral MoUs signed between the IMELS and several Developing Countries.

The side-event aims to provide an overview of the 31 Programmes carried out, since 2015, in 19 Developing Countries, focussing on the main priorities suggested by the Developing Countries involved and the different implementation methods.

Agenda
