

## Workshop

# "Energy efficiency & management as drivers to increase the competitiveness of EU agri-food companies"

EXPO Milan, 15<sup>th</sup> June 2015

"Palazzo Italia Pavillon"

[Sala Confindustria 4<sup>th</sup> floor](#)

### **Background**

*The innovative energy technologies generate benefits for the environment and can improve the economic competitiveness of the agrofood companies through the reduction of the production costs (direct and/or indirect). However their diffusion among small and medium-sized Mediterranean companies is still slow and requires specific actions to enhance awareness, targeted analysis and technology transfer. The objective of the SINERGIA project, co-financed by the European Regional Development Fund in the framework of the MED program, is to promote the use of energy efficiency models and the renewable technologies within the agrofood SMEs. The conference will be an opportunity to discuss around some advanced organisative and technological solutions as well as to show case studies of applications of energy efficiency models in the agrofood sector carried on by and international Mediterranean partnership.*

10:15	<b>Registration of the participants</b>
10:30	<b>Introduction and overview of the agenda</b> Nicola Colonna - ENEA, SINERGIA project coordinator
10:45	<b>Energy efficiency: using waste heat for process cooling in food &amp; drink industry</b> Paolo Colaïemma - ANIMA
11:00	<b>Energy audits in accordance with the EU Directive 2012/27 as an opportunity for energy saving in the agro-food companies</b> Carmine Lamanna - DNV GL
11:15	<b>Result of application of "3 stages" energy efficiency approach developed on a French SME food industry</b> Olivier Barrault - CERTINERGY Group
11:30	<b>The video-documentary of SINERGIA project</b>
11:40 - 12:40	<b>The lessons learnt from the SINERGIA national pilot actions: round table with experts from Greece, Italy, Spain, Croatia, France, Slovenia</b> Moderator Nicola Colonna
12:40	<b>Tools and facilities to encourage energy efficiency interventions at company level: a real-life demonstration</b> SINERGIA project team
13.10	<b>Cruising Mediterranean agrofood industry to 2020: hints from the SINERGIA final protocol</b> Marco Meggiolaro - EURIS
13.30	<b>Closing remarks</b>

Due to lack of availability of sites in the meeting room please pre-register by email to:
